

## Product technical data sheet

# **VISION 400 ECT-F TOUCH**

Cod. VISO402

### **General features**

Suggested internal fittings

Disclaimer: Images are purely indicative. The features and the accessories of the products may differ according to model and application.

	General leatures	
Temperature range	Adjustable -20°C / -10 °C	
Factory setpoint   Increment	-20°C   0.1°C	
Ambient working class   Climatic class	From +16°C to +25°C   C	
Nominal capacity	400 lt (14,1 cu ft)	
Gross capacity   Net capacity	347 lt (12,3 cu ft)   347 lt (12,3 cu ft)	
External dimensions (WxDxH)	60x67x196 cm	
Internal dimensions (WxDxH)	50x49x140 cm	
Net weight without any internal fittings	121 kg	
Package dimensions   Weight	Cardboard on pallet 65x72x213 cm   weight 133 kg	
	Wooden crate on pallet 72x77x213   weight 145 kg	
Structure	Monocoque type body, made of plasticized, non-atoxic white steel interior/exterior, coated with a special antibacterial-type film, or in inner 18/10 Aisi 304 stainless steel. Rounded corners and tray-type inner bottom.	
Insulation type	High density (43 kg/m³) in-walls injected PUF, without any CFC, environmental-friendly, water-foam based.	
Insulation thickness	70 mm rear / 50 mm sides	
Feet	No.4 unidirectional rollers + No.2 stabilizing feet	
Door	No.1 door made of tempered glass, triple thickness, self-closing thanks to the spring hinge and 90°stop position.	
Lightning	Full LED, all length of inner chamber, automatic switching on at door opening or from the display when the door is closed.	
Energy saving functions	Night & Day function	
Internal fittings	Customizable and height adjustable, it can mix independently: wire shelves supported by adjustable clips (dim.cm 46x45) fully extractible drawers made of aluminium, with dividers (WxDxH): cm 11,8x40x7,5 (nr 3 compartments) fully extractible drawers made of aluminium, without dividers (WxDxH): cm 39x40x7,5	

# Refrigeration Professional, ventilated, forced, hermetic compressor type Defrost Automatic, adaptive, including condensate water vaporization Refrigerant Natural R290 GWP | ODP 3 | 0

No. 4 wire shelves

st. steel wire drawers on telescopic slides (WxDxH): cm 43,5x40,5x6,2 st. steel wire shelves supported by adjustable clips (dim.cm.46x45)

**Refrigeration system** 

### **Electronic controller**

Controller TOUCH controller

Electronic controller, FULL TOUCH SCREEN 7" display, resolution 0,1°C, Type of controller

easily readable from the distance, with a real time temperature graph

and all operational data always available on the homepage.

**Power switch** Integrated in user's interface

Security features Settable user password

Visual and acoustic for temperature alarms failures such as:

Open door

High temperature

Alarm system Low temperature

Power failure, signaled when power is back.

Clogged condenser

Any functional failure/faulty parts

Latest 32 events displayed, 10 years data recorded on SD card and 1

year on flash memory, downloadable from USB port

Settable temperature limits alarms

NTC type probes for controller board + PT100 for DMLP monitor board **Control sensors** 

(optional)

Included, to prevent freezing and overheating Safety thermostat

Connectivity for remote alarms

transmission

Data and event recording

Set-up on the electronic controller board, can be remoted on request.

Modbus TCP/IP protocol available for data reading

Temperature recording Full recording of temperatures and alarms data

USB, SD and RJ45. Data export

### **Electrical and functional data**

Standard power supply 230V/1ph/50Hz

Standard plug type Schuko type "G"

**Compressor protection** Overload Protector included

Power absorption/current kW 0,32 (Amp 2,3)

Inrush current Amp 5 Noise level <45 dBA

Heat emission according to EN 12900 W 208

Hold over time at 20°C ambient (air) 1,5 h (from -20°C to 0°C)

Energy consumption at 20°C ambient 5 kWh/24h

**Compliancy** 

Directive 2006/42/EC (Machine directive)

Directive 2011/65/EC (ROHS II) Directive 2015/863/ EC (ROHS III) Directive 2012/19/EC (RAEE)

**Directives and regulations** Directive 2014/30/EC (EMC) Directive 2014/35/EC (LVD)

Regulation (EU) 517-2014 (F-gas) Regulation (EU) 1907-2006\_REACH

Available certificate

Non-flammable, non-explosive, non-corrosive, with adequate air **Application environment** 

exchange

## Accessories available on request

Visual and acoustic clarm for power failure  External contacts (Ethernet+ potential free) terminal board  Electric-digital lock with password protection  Digital lock, the door is opened by touching an ison on the display. The furthern may be possword protected. Mechanical release key supplied for emergency opening.  GSM module (including buffer batteries)  Converter module type 4-20mA (including contacts terminal board)  Wi-Fil module  Compliance kit to DIN 13277  Display in module for notify on mobile phones, via sme, overall module for a few parts of the contacts included this accessory excludes the installation of the contact terminal board)  Wi-Fil module  Compliance kit to DIN 13277  DIA Compliance kit to DIN 1		Accessories available on request
Dipital lock with password protection    Dipital lock the door is opened by touching an icon on the dipity in function may be password protected. Mechanical release key supplied for emergency opening.   GSM module (including buffer batteries)	Visual and acoustic alarm for power failure	
Electric-digital lock with password protection for emergency opening.  GSM module (including buffer batteries) Converter module type 4-20mA (including contacts terminal board)  Wi-Fi module Wi-Fi module Wi-Fi module Compliance kit to DIN 13277  Contacts the best of the protection of the contacts are more along the contacts are more along the contacts are more along the contacts and patients of the refrigerator of the contacts are more along the contacts and patients of the contacts are more along the contacts included (this accessor) excludes the installation of the CSM module to connect to, monitor and manage the refrigerator of the contacts are more along the contacts are more along the contact and the contact and the contact are more along the contact and the contact and the contact are more along the contact and the contact and the contact are more along the contact and the contact and the contact and the contact are more along the contact and the contact	External contacts (Ethernet+ potential free) terminal board	
Converter module type 4-20mA (including contacts terminal board)  Converter module type 4-20mA (including contacts terminal board)  Wi-Fi module  Wi-Fi module  Pilug- in module to connect to, monitor and manage the refrigerator wirelessy.  Includes the electric digital lock, buffer batteries for power failure alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal and the extremal terminal board with potential fixed alarm signal signal and the extremal terminal board with potential fixed alarm signal signal and the extremal terminal board with potential fixed alarm signal signal and the extremal signal signa	Electric-digital lock with password protection	function may be password protected. Mechanical release key supplied
Extend contacts included (this accessory excludes the installation of the CSM module)	GSM module (including buffer batteries)	Plug-in module to notify on mobile phones, via sms, overall
Writeriasty Includes the electric digital lock, buffer batteries for power failure alarm signal and the external terminal board with potential free contact  Wisual, acoustic alarm and fully independent recording system, with accuracy of JPC thanks to the PTIO0 probase used for temperature detection. DNLP will take over alarming function when installed as integrated module on the Ext-if function controller board. The module is fed by standard rechargeable batteries (power failure alarm batteries included) to register temperatures and events even in case of power failure and power standard in the propertures and events even in case of power can be applied to the properture and events even in case of power can be applied to the properture and events even in case of power can be applied on board on the SD card, through which tables and graphs are created  FIOCCHETTI COLD EYES cloud monitoring  Annual monitoring service, Cloud based, featuring the notification of alarms and failures from pc thanks to a dedicated app, including SMS messages and emails, also allowing the full download of recorded data.  Monitoring system allowing the supervision of one or several refrigerators thanks to the access to historical data and to present equipment status. It allows the creation and export of temperature enables the connection of up to 100 refrigerators installed in the same building and connected to the same net (e.g., a hospital).  Solid type door  Plesse refer to PREEZER series  Additional wire shelf kit  St. steel wire drawer on telescopic slides  Extractible drawer on telescopic slides  Lockable drawer for narcotics H mm 100  Rack 140x420x150H mm (max 3 per each shelf)  Plexiglas front panel for extractible drawer  Castors kit with brakes  35 mm access port with stopper  Port hole mm 15  PTIO0 sensor with free contacts  Mains voltage stabilizer  Non-standard plug and cable  Power 150x/60Hz	· · · · · · · · · · · · · · · · · · ·	External contacts included (this accessory excludes the installation of the GSM module)
Compliance kit to DIN 13277   alarm signal and the external terminal board with potential free contact   Visual, accuracy 0.1 °C thanks to the PTIO0 probes used for temperature detection. DMLP will take over alarming function when installed as integrated module on the Ext-1 Touch controller board. The module is feed by standard rechargeable batteries (power failure alarm batteries included) to register temperatures and evere win case of power outage. Data download and their management are made possible by CAPTURE Software, supplied on board on the SD card, through which tables and graphs are created	Wi-Fi module	
accuracy 0,1°C thanks to the PTIOO probes used for temperature detection. DML P will take over alarming function when in stalled as integrated module on the Ect-f Touch ontrolled board. The module is fed by standard rechargeable batteries (power failure alarm batteries included) to register temperatures and events even in case of power outage. Data download and their management are made possible by CAPTURE software, supplied on board on the SD card, through which tables and graphs are created  PTIOO product temperature simulation probe  FIOCCHETTI COLD EYES cloud monitoring  Annual monitoring service, Cloud based, featuring the notification of alarms and failures from pc thanks to a dedicated app, including SMS messages and emails, also allowing the full download of recorded data.  Monitoring system allowing the supervision of one or several refrigerators thanks to the access to historical data and to present equipment status it allows the creation and export of temperature graphs of selected periods or of specification of one or several refrigerators thanks to the access to historical data and to present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications and the present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications and the present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications and the present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications and the present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications and the present equipment status it allows the creation and export of temperature graphs of selected periods or of specifications. A single license enables the comment of the present exports of selected periods or of specifications. A single license enables the comment of the present expo	Compliance kit to DIN 13277	alarm signal and the external terminal board with potential free contact
FIOCCHETTI COLD EYES cloud monitoring alarms and failures from pc thanks to a dedicated app, including SMS messages and emails, also allowing the full download of recorded data.  Monitoring system allowing the supervision of one or several refrigerators thanks to the access to historical data and to present equipment status. It allows the creation and export of temperature graphs of selected periods or of specific hours. A single license enables the connection of up 100 refrigerators installed in the same building and connected to the same net (e.g., a hospital).  Solid type door Please refer to FREEZER series  Additional wire shelf kit  Extractible drawer on telescopic slides  Extractible drawer without inner dividers on telescopic slides  St. steel wire drawer on telescopic slides  Lockable drawer for narcotics H mm 100  Rack 140x420x150H mm (max 3 per each shelf)  Plexiglas front panel for extractible drawer  Castors kit with brakes  35 mm access port with stopper  Port hole mm 15  PT100 sensor with free contacts  Mains voltage stabilizer  Non-standard plug and cable  Power 220V/60Hz  Power 115V/60Hz	DMLP TOUCH Digital Monitor	accuracy 0,1 °C thanks to the PTI00 probes used for temperature detection. DMLP will take over alarming function when installed as integrated module on the Ect-f Touch controller board. The module is fed by standard rechargeable batteries (power failure alarm batteries included) to register temperatures and events even in case of power outage. Data download and their management are made possible by CAPTURE software, supplied on board on the SD card, through which
